

Energy efficiency in buildings part 1

Sustainable construction
BIM and building simulation

Hygrothermal component simulation

Special topics in reinforced concrete
construction

Life cycle assessment

Energy efficiency in buildings part 2

Sound insulation in timber and lightweight
construction and in technical building systems

Statistical methods and data science

Concrete canoe

Urban Mining

Energy and building technology

Building physics

Civil Engineering

Sustainability

Architecture

Each field corresponds to a module with 5 CP. The colour coding is based on higher-level degree programmes.
