

Degree Programme International Bachelor of Engineering (B.Eng.)

Rosenheim

Technical University
of Applied Sciences

BACHELOR'S DEGREE PROGRAMME

International Bachelor of Engineering

- Qualification: Bachelor of Engineering (B.Eng.)
- Duration: 8 semesters (7 theoretical and 1 practical)
- Credit Points (CP): 240
- Teaching language: English & German
- Special features: Start your studies in English and finish in German. Choose one out of seven engineering specialisations, cooperating closely with leading industry partners.

Course profile

With the International Bachelor of Engineering, you will be professionally trained, well-educated in more than one language, and you will have excellent connections to the industry to enter the job market. Start your career in one out of seven specialisations:

Rosenheim

- Electrical Engineering and Information Technology
- Energy and Building Technology
- Engineering and Management
- Mechanical Engineering
- Mechatronics
- Medical Technology
- Plastics Engineering / Sustainable Polymer Engineering

During the first three semesters, you will study in English, while acquiring German language skills as well, starting with level A2 of CEFR. This will enable you to change into the German-taught main study course after the third semester and study alongside German students.

Application

- Course starts: 15 March (summer semester)
- Application period: 1 May – 30 November
- Higher education entrance qualification checked by uni-assist
- Special language-related admission requirements
English B2, German A2
- Application: online
