Corona Regulations at TH Rosenheim

Date: 4 February 2022

Corona protection measures and safety guidelines

TH Rosenheim is committed to protecting students and staff from contracting the SARS-CoV-2 coronavirus. The regulations aim at creating a safe and healthy learning environment for all students. We ask for your cooperation and understanding as the situation is constantly evolving due to the dynamics of the pandemic. In any case, the applicable regulations for university operations will apply. These can be found here: Regulations to protect against new infections - TH Rosenheim

Required vaccinations against the virus

In order to participate in classes and events, TH Rosenheim requires full vaccination coverage against COVID-19, and strongly recommends booster vaccinations. Without vaccination, participants may not be able to attend on-campus classes or off-campus events.

Students are required to provide proof of their vaccination, i.e. via EU Digital COVID certificate.

Students must schedule vaccinations early to be considered vaccinated in time. Students are responsible to be vaccinated prior to the start of their studies at TH Rosenheim. A list of vaccines recognised in Germany for full protection (also by combination of recovery and vaccination) can be found here: Paul-Ehrlich-Institut - Dossier Coronavirus SARS-CoV-2 and COVID-19 (pei.de)

Negative test proof

If no recognised proof of recovery or vaccination can be provided (i.e. non-recognised vaccine in Germany), an official PCR test, PoC-PCR test or PoC antigen test may be required at any time. This written or electronic negative test as proof of the absence of infection with the SARS-CoV-2 coronavirus must be updated daily at the costs of the students.

Supplementary measures such as hygiene and testing protocols, social distancing and mandatory face masks may apply on site.

FFP2 masks are mandatory for students in buildings on the university campus at TH Rosenheim.
